Experienced Mud Logger

Description

Company has openings for Experienced Mudloggers & Trainees. All applicants must be willing to work Offshore on 24 hour call schedule. Mudloggers and trainees must have A high school diploma or GED. A Bachelor's degree is preferred. Must have reliable transportation. Applicants must be able to pass drug and alcohol screen.

Full Job Description

As a mud logger, you will monitor and record drilling activity, providing information to the drilling team about a well's status during the extraction of oil or gas.

ESSENTIAL DUTIES AND RESPONSIBILITIES INCLUDE THE FOLLOWING:

- Work in wellsite units collecting, processing, logging, and describing rock samples.
- Monitor computer recordings of drillings.
- Interpret information and feed it back to the data engineer and drilling team to enhance safety and success.
- Use various laboratory techniques to analyze samples.
- Operate and maintain a real-time computer-based data acquisition system, which records all aspects of rig activity.
- Predict dangerous situations, such as over-pressured formations.
- Assist the wellsite geologist during coring operations.
- Provide written reports to the data engineer, drilling team, and company.
- Install or connect pump-stroke counters, mud-tank level indicators, gas agitator, temperature probes, RPM sensor, water line, drain lines, depth systems, and other measurement devices or sensors (WITTS-0) to drilling rig equipment.
- Connect electrical conductor cables to measurement devices or sensors. Install remote rig monitoring instruments on the rig floor or Company Representatives office for data acquisition.
- Install gas agitator at shale shaker area on a drilling rig for the detection of hydrocarbons in the drilling mud.
- Monitor gas detection equipment and analyze gas data for hydrocarbons.
- Collect mud and drill cutting samples during drilling operations and evaluate
